Professional Summary

Creative and detail-oriented Front-End Developer with hands-on experience in building responsive and user-friendly web interfaces using HTML, CSS, JavaScript, React.js, and Tailwind CSS. Along with web development, experienced in developing embedded system projects such as fingerprint-based authentication and gas leakage detection using Arduino. Strong problem-solving skills with the ability to work independently and collaboratively. Seeking an opportunity to contribute to scalable applications while growing.

Technical Skills

- Languages & Frameworks: C (basic), HTML, CSS, JavaScript, React.js, Tailwind CSS, Python (basic)
- Tools & Platforms: Git, GitHub, VS Code, Power BI, Excel, MS PowerPoint, MS Word
- Concepts: Responsive Design, Component-Based Development
- Soft Skills: Creative Thinking, Team Collaboration, Problem Solving
- Prompting
- Hardware & Embedded Systems: Arduino programming and embedded systems development with experience in sensor interfacing, digital output control, and hardware–software integration.

Projects

- **Fingerprint Door lock** - Built an Arduino-based biometric system for fingerprint enrollment and real time verification using an optical fingerprint sensor and serial communication.
- **Human Following Robo Car** - Developed a human-following robotic car using Arduino, ultrasonic, and IR sensors to track human movement and control motor direction in real time.
- **Gas Leak Detection** - Developed an Arduino Nano–based gas leakage detection system using gas sensors to provide real-time monitoring and safety alerts.
- **IgniisTech Website** – (<https://68d5327f6f99101f48244ab2--quiet-beignet-9ed595.netlify.app/>) I made website for official corporate website of IgniisTech using React.js and Tailwind CSS with smooth animations and responsive layouts.
- **To-Do List App** – (<https://202f10b8.todolist-erb.pages.dev>) Created a productivity app using HTML, CSS, and JavaScript to dynamically manage tasks with add/delete and completion features.
- **University Website** – Built a comprehensive university portal with React.js and Tailwind CSS, featuring academic programs, faculty, testimonials, and research highlights.
- **E-commerce Website** – Developed a fully responsive platform with product cards, image sliders, interactive cart, and checkout flow using HTML, CSS, and JavaScript.
- **Plagiarism Checker** – Developed a basic Python application to compare text input and detect similarity for potential plagiarism cases.

Internship

Pixel Truth:

- Contributed to a Fraud Detection and brand safety project "I contributed to projects for Angel One during my internship."

Iniis Tech:

- I made a fitness website to igniistech using HTML, REACT JS, TAILWIND CSS.

Education

B.voc in Artificial Intelligence & Robotics – Dayalbagh Educational Institute

ITI in Automobile (4-Wheeler)

12th – U.P. Board

10th – U.P. Board
